Request of the European Network of Research Ethics Committees (EUREC) Drafted on the EUREC Meeting in Paris, November 3rd, 2014

To comply with the spirit and the wording of Regulation (EU) No 536/2014 and in particular with art. 2,4,8,10,14,19,20,23,42-44 and annex 1, it is necessary that MSs:

guarantee ethics committees full and direct access to the application and data-base (including downloads) through the EU portal, from the time the application is submitted. This will ensure effective review by independent ethics committees and avoid undesired scenarios such as tacit approvals. The necessary access could be achieved via the existing portal functionalities.
